The first flags were probably in China. People flew flags in China over 4,000 years ago. Each part of the army had its own flag so the soldiers could see their leaders. Early flags were sticks of wood. They had pictures cut into the wood . Iran had metal flags about 3,000 years ago. Old Greek coins show pictures of flags. People in Rome also used flags over 2,000 years ago. People in Rome also used flags over 2,000 years ago. People first made flags of cloth about 2,000 years ago. Those flags looked like today's flags. . Flags are important at sea. Most ships fly their own country's flag and the flag of the

country they are visiting, when a ship flies only its own flag, It is ready to fight. Every country now has a flag. Every US state has a flag. Clubs, teams and schools have flags. The Olympics flag has five rings of five colours. Each ring stands for, or represents a continent. It means that people from five continents-Africa, Asia, Europe, North America and South America come to play. Railways also have flags. Railways flags tell the trains what to do, for example a red flag tells the train to stop just like a stop sign. A blue, white or green flag tells the train to go. A blue, white or green flag tells the train to go. A blue flag on the side of a train means someone is working on the train. It means nobody can move the train.

Felling down of Trees to make way for Metro rail in Bangalore.

OR

'Knowledge is Power'.

SECTION – B

5. Read the following passage carefully and answer the questions set on it :

The advancements in science and technology have enabled man to roam in sky like birds and move in the water like fish. But he has not mastered the art of living well on earth. If man has not learnt how to lead a worthy human life, what is the value of his existence ? The man who is not proud of the land of his birth is worse than a corpse. Learn to love your country without any hatred for other countries. Get rid of differences based on community , creed or caste and give up feelings of aversion and hatred. Regard all mankind as one family.

Students need both faith in God and determination. There is the example of a great American scientist, Thomas Alva Edison. He was born in a poor family on February 11, 1847, in the state of Ohio. Although he made no progress in his studies, he became a great inventor, thanks to his supreme self-confidence and his perseverance and determination in the pursuits of his experiments. His early experiments had untoward results, which provoked his parents to punish him and ultimately to send him out of the home. For a time he earned a living by selling sweets in trains. Once, a guard slapped him for causing explosion in the closet of a train. His hearing was affected there by. A benefactor came into his life after he had saved a child from being run over by a train. He got a job in a telegraph company and was free to carry on his experiments.

From such beginnings, Edison became the greatest inventor of our times because of his tremendous perseverance and tireless experiments. The world owes to him the electric bulb, the gramophone, the telephone and many other inventions. If without any regular schooling, Edison could achieve all this, it; was because of his confidence in himself, his firm determination and tireless energy. In addition to their academic studies, these are the qualities a student should acquire. They should associate with right-minded persons, whose company will improve their mind and character. They should bear in mind that from the point of view of individual or the community , they to cultivate good qualities along with the pursuit of their studies. Virtues alone can help one to elevate himself in life. A man without virtues and gratitude is bound to fail in life.

Whatever may be one's scholarship or intelligence, without the strength of character they are likely to de-humanize man. You must fortify yourself with the strength of character, along with the acquisition of knowledge. There is nothing that cannot be achieved by a righteous person. One seeks education for earning a living. But one cultivates virtues for sublimating life. It is only when education is combined with good qualities that you can experience the bliss of fullness.
